Soham Jain

(240) 728-8946 jainsoham01@gmail.com sjain2025.github.io linkedin.com/in/soham-jain1 github.com/sjain2025

Education

Carnegie Mellon University **May 2027**
B.S. in Computer Science; Minor in Machine Learning *Pittsburgh, PA*

- **Relevant Courses:** Data Structures and Algorithms, Computer Systems, Functional Programming, Discrete Math, Linear Algebra, Multivariable Calculus, Artificial Intelligence, Machine Learning, Computer Vision, Mobile and Web App Development

Technical Skills

Languages & Operating Systems: Python, Java, C, C++, JavaScript, HTML/CSS, TypeScript, Rust, SQL, MATLAB, Linux/Unix, macOS
Developer Tools: Git, Docker, Vim, Amazon Web Services (AWS) EC2, MongoDB, Google Cloud, Firebase, Android Studio, PostgreSQL
Libraries & Frameworks: React, Vite, Express, Django, Node.js, Next.js, Flask, NumPy, Pandas, TensorFlow, PyTorch, Keras, OpenCV

Work Experience

ScottyLabs **Aug 2025 – Present**
Software Engineer *Pittsburgh, PA*

- Utilizing **React, TypeScript**, and **Railway** to integrate live data from CMU Dining Services into an app that streamlines menus and specials for **10,000+ monthly users**.
- Leading the implementation of a geospatial routing system with **Rust** and **REST APIs** to sort campus dining locations by walking distance.

Vytal.AI **May 2022 – Dec 2024**
Software Developer, Machine Learning Engineer *Alexandria, VA*

- Used **Flask, Next.js**, and **MongoDB** to develop a quantitative brain health assessment app via novel eye-tracking software at Venture Capital-backed startup.
- Optimized **Python** biometric pipelines and deployed ML models on **AWS EC2** to scale testing to **300+ clinical beta users**.

Virginia Tech **April 2024 – May 2025**
Computer Science Research Intern *Blacksburg, VA*

- Designed quantum-classical hybrid algorithms with **Python** and **MATLAB** to address graph coloring and other boolean SAT problems, **reducing computation costs by up to 65%** compared to leading models.

Projects

RoutineRemind **June 2022 – Present**

- Developing a **patent-pending** app with **JavaScript, HTML**, and **Firebase** to create personalized schedules for children with autism.
- Scaling product to **200+ active users** through clinical partnerships and integration in local schools.
- Selected **first place in the Congressional App Challenge**; demoed app at Capitol Hill.

EyeLS **Aug 2023 – Sep 2025**

- Constructed a gaze-tracking application that maps eye movements to click locations with **92% calibration accuracy**.
- Granted research stipend and **Technical Excellence Award** from IEEE (top 3 out of 300+ projects).

Research & Publications

A Transformer-Based Approach to Diagnose ALS via EEG Analysis **Feb 2025**
17th International Conference on Advanced Computer Theory and Engineering

LapseNet: Hybrid CNN-LSTM Approach for Accurate & Efficient Vision-Based Fall Detection **Nov 2024**
6th International Conference on Robotics and Computer Vision

- Recognized with **IEEE Best Presentation Award** (top 1.5% of 500+ participants).

ConVox: A Deep Learning Approach for Accurate Multilingual Voice Disorder Detection **Aug 2024**
5th International Conference on Big Data, Artificial Intelligence and Internet of Things Engineering

RexDash: A Dashboard for Analyzing Replica Exchange Molecular Dynamics Simulations **Oct 2023**
*Journal of Student-Scientists' Research (**George Mason University Computer Science Internship**)*
